

When: 12 mars 09.00-17.00-13 mars 09.00-13.00
Where: Göteborg Quality Hotel 11

Industrial Skills Seminar

Summ Industrial skills - "SMART Production"

This year, the Summ Industrial Skills celebrates its 5-year anniversary and will therefore fill the seminar with extra many news, concrete projects and reference experiences. We are pleased that for many this year's "one-stop-shop". With leading technologies, we show the latest technologies in digital production and offer cost-effective solutions in machining (CAM), process simulation, robotics, production logistics, PLM, CAD and integrated quality. We come in regular order to turn to both decision makers and users to offer you two well-invested days.

Summ works as a strategic partner / reseller for Siemens Industry Software within production issues and is Nordic Partner for HP 3D printers. We are established with offices in five locations around Scandinavia. Siemens has launched Smart Expert, which is a specialization program for partners. These partners are recognized experts in specific focus areas. At Summ Systems, we are proud Smart Expert certified within NXCAM, Tecnomatix, NXCAD and Teamcenter, and on the way to becoming it also in the QMS area (IBSQMS). Again, warmly welcome to two technology-filled days with world-leading solutions in digital production efficiency! Come and discover what this can mean for you and your business! We will continuously update you with agenda and content! Secure your place now by signing up here!

Hotel: SEK 1071 / single room and night SEK 1161 / double room and night. Guest email in their booking request to q.11@choice.se
